

What is it?

Granite State Market Match is a nutrition incentive program at NH farmers markets. This program doubles the value of SNAP dollars, providing customers with increased access to nutritious and local food.

How does it work?

1. Customers swipe their SNAP/EBT card at the farmers market token booth with the amount of money they want to spend.

2. In return, customers receive wooden tokens to shop with and the first \$20 will be doubled. *For example, a customer taking \$20 off of their EBT card will receive an additional \$20 in tokens, providing them with a total of \$40 to shop with at the farmers' market!*
